Now Introducing:

VIRTUAL OFFICE SPACE

4 KEY BENEFITS

1 ACCESSIBILITY

Virtual Office Space (VOS) was created during the initial phases of the pandemic with the intention to bridge the gap between physical office space and working remotely. Virtual Office Space addresses the vulnerabilities and insecurities of using VPN Access to bridge your remote network with the office. With VOS, you can connect to your office resources anywhere with the confidence that you are using the highest levels of security with single sign-on.

2 SECURITY

In current times, many companies are having to insist employees work remotely. So, what does that mean for security? Virtual Office Space utilizes single sign-on and DUO to eliminate the need for VPN access. This solution eliminates the vulnerabilities encountered when using the bring your own device model.

3 MOBILITY

Enjoy the ability to work from any device as you go about your day or change locations. Scaling from multi-screen desktops all the way down to your mobile device you can conveniently pick up where you left off.

4 SCALABILITY

Virtual Office Space (VOS) is scalable in the sense that it was designed to be as big or as small as needed, growing with your business or scaling down with demand. When designing this solution, we acknowledged that sometimes working remotely can feel burdensome in comparison to office setups, to counteract this, VOS allows you to take your desktop with you on any device using only a single password.
